## **Abstract of CN 2059579 (U)**

The utility model relates to a device for inserting needle into vein for beasts, belonging to veterinary medical appliances. The utility model is composed of a gun barrel system, a needle holder, a trigger system, etc. Machine parts, an injection needle can be arranged in the needle holder; the push rod is used for loading and directly controlling the needling depth, and the nuts are used for regulating the needling strength. Thus when the utility model is used for the injection, the needling is rapid, the position is accurate, and the depth and the strength is suitable. The utility model has the advantages of simple structure, and safe and convenient operation.
